

HEC POWER BANK

MCCB Panel Board System

Front view of HEC PB

Inside view of HEC PB

Features:

- Ready made & customized solutions for load management
- Modular construction & compact size provides economy of space, time & cost
- Designed for floor mounting / wall mounting
- Specially designed modular busbar will ensure safety
- Offers simplicity & flexibility
- Elegant & sleek in appearance

Range:

Three basic versions

200A/250A
Panel Board System

320A/400A
Panel Board System

630A/800A

Metering System:

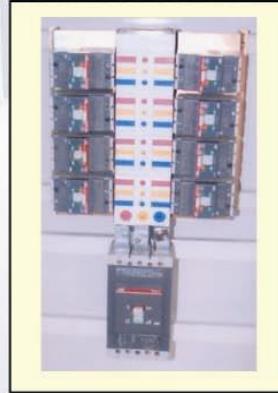

This module can be assembled on top of the basic module. Two types of metering module are available, namely, analog and Digital. The metering module is provided with selector switches.

Main Module:

Basically it consists of two parts, incoming module & outgoing module.

Cable Way System:

Cableways are on both side of the basic module for termination of incoming & outgoing MCCBs.

Outgoing Module:

They are available with 4, 6, 8, and 12 ways outgoing circuits suitable for mounting three pole MCCBs up to 250A. Adequate space is provided for terminating the cable onto the MCCBs.

Incoming Module:

The incoming module accommodates MCCB up to 250A in 200A/250A Panel Board System and up to 400A in 320A/400A Panel Board System. They are all supplied with their own dedicated set of preformed copper interconnections. For 500A/630A/800A Panel Board System Incoming module accommodates MCCBs up to 800A.

For 200A/250A Panel Board System:

SL No.	Model Name	Height (with out metering system)	Length	Depth
01	HEC250P4W	1000	960	200
02	HEC250P6W	1000	960	200
03	HEC250P8W	1000	960	200
04	HEC250P10W	1150	960	200
05	HEC250P12W	1150	960	200

For 320A/400A Panel Board System:

SL No.	Model Name	Height (with out metering system)	Length	Depth
01	HEC400P4W	1150	960	200
02	HEC400P6W	1150	960	200
03	HEC400P8W	1150	960	200
04	HEC400P10W	1350	960	200
05	HEC400P12W	1350	960	200

500A/630A/800A Panel Board System will be produced as per as the requirements of the clients
